Final English Exam

Class :

Name :

...../20

Many animals as Tigers, bears elephants and fennecs are in danger of extinction. They have many natural enemies, but man is their biggest enemy. The giant Panda is a well-known and well-loved species which is driven to extinction by habitat loss. It has become one of the most endangered mammals in the world, with only 1,600 of them left. Although they have been protected from hunting since 1984, Pandas are still disappearing.

Pandas live in the south central of China. It is a lazy animal. It feeds on bamboo trees and sometimes eats birds. Adult male measures around 1.2 to 1.9 m high and weighs up to 160 kg.

Panda has thick black and white fur. This mammal lives up to 20 years. It is a vulnerable species, so there are few numbers living in China mountains. Because of deforestation and pollution. People hunt them for clothing or decorative items.

Reading comprehension (7pts)
Activity one: Read and fill in the profil. (3 pts)

Profil
Name :

Classification:

Diet:

Height:.....

Weight:

Habitat:

Activity two: answer by "true" , "false" or "not mentioned". (3pts)

1. Panda is an active animal.
2. It feeds mainly on plants.

3. Panda's female has three babies each year.
